

Clean Shot Series
**CHAMBER
REAMERS**

**HIGH QUALITY FINISH AND ACCURACY
THE FIRST TIME & EVERYTIME**

CHAMBER REAMERS

The CS series Chamber Reamer takes geometry perfected over decades of experience and combines it with the latest in substrate and coating technology. It applies this technology to every custom design we produce for rifle and pistol Chamber Reamers.

Made to CIP / SAAMI specifications or custom specifications for standardized cartridges.

Pilots and bushing optional and available upon request.

DESIGN

Primary & Secondary relief design with cylindrical margin for chatter-free reaming and exceptional finishes.

SUBSTRATE

Ultra-fine micrograin carbide with high degree of transverse rupture strength (TRS) to ensure toughness in the most unforgiving of machining environments.

COATING

Heat resistant coating with 2-micron thickness ensures longevity while minimizing edge rounding to ensure high degree of sharpness in the cut. Additional post-polishing process ensures smooth chip clearance.

POPULAR CALIBERS INCLUDE:

Rifle Calibers

.22LR	.17HMR	5.7FN	0.3	7.62mm	.224 VALK	5.56/.223	6.8 SPC	6.5	.458 Socom
